Since the 1950s, subsidiaries of the most prestigious foreign multinationals have played a key role in Brazilian economic development, thus creating a very competitive domestic market. On top of this, government interventions in the last few decades have been inconsistent and contradictory, resulting in a series of economic crises. Only the most resilient Brazilian firms have been able to survive and prosper in this challenging environment. This book analyzes a variety of leading Brazilian multinationals and examines their competences and competitive strategies in a variety of different settings. It develops an innovative analytical framework based on international business, international operations management, and international human resources management. This framework is then applied not only to Brazilian multinationals, but also to firms from Latin America, Russia, India, and China. Thus, the book provides novel insights into the rise of Brazilian multinationals and the increasingly important role played by emerging economy multinationals in the global economy.

Afonso Fleury is Professor of Technology, Work, and Organization in the Production Engineering Department of the University of Sao Paulo. He has been a research fellow at the Institute of Development Studies (UK), the Tokyo Institute of Technology (Japan), École Nationale des Ponts et Chaussées (France), and the Institute for Manufacturing, University of Cambridge (UK). He is currently an associate editor of the Journal of Manufacturing Technology Management and Vice-President (Americas) of the Production and Operations Management Society.

Maria Tereza Leme Fleury is the Dean of the School of Business Administration of Fundacao Getulio Vargas, in Sao Paulo and former Dean of the School of Economics, Business Administration, and Accountancy of the University of Sao Paulo. Her publications cover areas such as strategy and competence management, human resources management, management of organisational culture, and labor relations. She was Visiting Professor at ESSEC (France) and at the Institute for Manufacturing, University of Cambridge, as well as a research fellow at the Institute of Development Studies (UK) and the Institute for Developing Economies (Tokyo). She is currently Director of ANPAD (Brazilian Academy of Management).
Brazilian Multinationals
Competences for Internationalization

Acknowledgments

We have been studying multinational enterprises for several decades. As we live in Brazil, we mainly research their subsidiaries within the local operating and institutional context.

The research project on Brazilian multinationals and their management models that gave rise to this book, however, is more recent. It began in 2006, with the support of two Brazilian agencies: CNPq – Conselho Nacional de Desenvolvimento Científico e Tecnológico (the National Scientific and Technological Development Council) and FAPESP – Fundação de Amparo à Pesquisa do Estado de São Paulo (the Research Foundation of the State of São Paulo). Our home institutions, namely, the Departments of Production Engineering and of Business Administration of the University of São Paulo, and the School of Business Administration of Fundação Getulio Vargas, granted the conditions for the achievement of our objectives as well.

Our project matured at Cambridge University, where we were visiting researchers at the Institute for Manufacturing (IFM) in 2007, thanks to our dialogues with the researchers of various institutes. We are particularly grateful to Mike Gregory and Yongjian Shi, of the IFM, and to Peter Williamson and Eden Yin, of the Judge Business School.

In Birmingham, John Child and Susana Rodrigues, of the Business School, were always points of reference for our work, while David Bennett, at Aston University, added important contributions from his experiences in Asian countries.

Raphie Kaplinsky, John Humphrey, and Hubert Schmitz of the Institute of Development Studies (IDS) in Brighton continued to be important interlocutors, even though Brazil was no longer being covered by IDS studies.

Two distinguished scholars from the international business area were of great help for us to penetrate the meanders of this fascinating field of knowledge: John Dunning and John Stopford. Dunning welcomed us, with his generosity and interest, into the heart of the
Acknowledgments

Academy of International Business, while Stopford, who is well aware of Brazilian reality within the context of the global economy, offered us precious advice.

In the United States, we owe special thanks to Ravi Ramamurti, of Northeastern University, for the projects with which he entrusted us and for the invariably constructive dialogues. We would also like to thank Alvaro Cuervo-Cazurra for his insights into multilatinas.

A group of Brazilian researchers shared our journey. Moacir de Miranda Oliveira Junior and Felipe Borini conducted with us several of the activities described in this book. Our colleagues Angela Rocha, Betânia Tanure, Miguel Caldas, Thomas Wood, Alvaro Cyrino, and Eduardo Vasconcellos contributed with their knowledge and experience on different topics related to Brazilian firms and internationalization issues.

The doctoral students Fernanda Ribeiro, Germano Glufke Reis, Eduardo Pinheiro, Erika Barcellos, Dinorá Floriani, and Natacha Bortóia da Silva provided us with important insights during the journey.

We are grateful to Paula Parish, from Cambridge University Press, who acknowledged the value of publishing a book on Brazilian multinationals and guided us toward that aim. We also want to thank the three anonymous reviewers engaged by Cambridge University Press for their valuable comments.

We dedicate this book to our sons, André, Fernando, and Pedro, who not only encouraged us, but also gave us unwavering and interested support.
