Economic Law as an Economic Good
Economic Law as an Economic Good

Its Rule Function and its Tool Funktion in the Competition of Systems

Edited by
Karl M. Meessen

in cooperation with
Marc Bungenberg and Adelheid Puttler
Acknowledgements

I must, first of all, express my gratitude to the two co-editors Professor Adelheid Puttler (Ruhr Universität Bochum) and Privatdozent Marc Bungenberg (currently representing a chair at Erlangen University). Originally, it was they who came up with the idea of doing something together. Conceiving the subject, selecting the speakers and panellists, all of this was discussed and decided by the three of us, unanimously so. Adelheid Puttler and Marc Bungenberg also took more than a fair share in organizing the Düsseldorf Symposium of 2-4 November 2007 as well as in chairing its lively debates. Soliciting and monitoring the elaboration of the papers, hélas, landed on my desk. Yet, thanks to the authors’ sense of constructive cooperation, that part of the job proved enjoyable, too. Actually, the authors, nearly all of whom had taken part in the conference from the first through the last minute, were the ones who had to cope with the really hard work. To them, therefore, the three editors are deeply indebted. We wish to add our thanks to Leyla Davarnejad, Katharina Gierschke, Helge Heinrich and Carmen Lange, all of them promising young lawyers, for their assistance during the 48 hours of the conference. Basile Kouznetzoff, a Paris based professeur d’anglais, kindly helped Professor Ihrai of Rabat/Morocco, refine the English of his paper and of his oral presentation at the symposium. Professor Joseph Kruse, director of the Heinrich-Heine-Institute, also deserves our cordial thanks. In his institute located in the midst of the old town of Düsseldorf, he introduced us to all sorts of memorabilia of that great poet who, regrettably, had left his native Düsseldorf, then part of Prussia, to make Paris the centre of his activities. Heine obviously preferred the French press law environment to the one of the Kingdom of Prussia during one of its more reactionary phases. We are also grateful to the Fritz Thyssen Stiftung for its contribution to the financing of both the conference and the publication. Special thanks go to Patrick Sellier and his team for an impeccable handling of the printing process.
