

Peter Heusser

Anthroposophy and Science

An Introduction

PETER LANG
EDITION

Contents

1	Introduction	17
1.1	Summary.....	24
2	Epistemology: Knowledge and truth	25
2.1	The theory of knowledge or epistemology: knowledge of knowing.....	25
2.2	Experience	30
2.3	Thinking as a fact of experience.....	36
2.4	Objective empirical knowledge	41
2.5	Science and reality.....	52
2.6	Objective ontological idealism	56
2.7	Summary.....	60
3	Science and ontological idealism in physics and chemistry	61
3.1	Empirical ontological idealism instead of reductionism	61
3.2	Spirit in matter	78
3.3	Emergence, self-organisation and causality in physics, chemistry and biochemistry.....	80
3.4	Summary.....	96
4	Ontological idealism in biology	99
4.1	Chemical explanation of life? Genes, genetic information and proteins	99
4.2	Gene regulation. From a static to a dynamic concept of the gene	105
4.3	Self-organisation and causality in biology and Goethe's archetype	109
4.4	Organism or mechanism?.....	115
4.5	Typus and morphogenesis	119

4.6	Organic versus inorganic cognition	122
4.7	Morphogenetic fields or morphogenetic substances?	129
4.8	Causality and systems biology.....	141
4.9	Biology beyond vitalism and mechanism	147
4.10	Reflections on the thermodynamics of organic processes.....	150
4.11	Life versus death: physical and etheric organisation	153
4.12	Summary.....	161
5	Neurobiology, psychology and philosophy of mind: the reality of the soul and spirit	163
5.1	Neurobiology and the emergence of consciousness. Is the soul real?	163
5.2	The problem of ontological monism and psychophysical causation	169
5.3	Consciousness versus life: organic and psychological activity	172
5.4	The soul as a formative principle. The “astral” organisation.....	177
5.5	Spirit versus soul: the emergence of self-consciousness and self-determination	183
5.6	Soul and spirit: Intelligence in animals and humans	189
5.7	The importance of the spiritual factor in health and medical care.....	197
5.8	The question of freedom	202
5.9	A comprehensive basis for medical anthropology: body, life, soul and spirit.....	221
5.10	Summary.....	228
6	From anthropology to anthroposophy.....	231
6.1	The question of the reality and cognition of the spiritual	231
6.2	The anthropology and anthroposophy of I. P. V. Troxler.....	240

6.3	The anthropology and anthroposophy of I. H. Fichte	243
6.4	Summary.....	249
7	Anthroposophy as an empirical spiritual science	251
7.1	The limits to knowledge and their transcendence	251
7.2	Rudolf Steiner's empirical spiritual science.....	258
7.3	Summary.....	269
8	Anthroposophical spiritual science and natural scientific medicine	271
8.1	The fourfold image of man as a basis for medical anthropology, nosology and therapy.....	271
8.2	Scientific examination of anthroposophical concepts and medical rationale.....	276
8.3	Anthroposophical medicine and modern scientific medical research.....	281
8.4	Concerning the extension of medical anthropology through anthroposophy	287
8.5	The status of clinical scientific research in anthroposophical medicine	296
8.6	Summary.....	315
	Bibliography	319
